

BERNAT ALCUDIA

FULL STACK DEVELOPER

■ ABOUT ME

I am a Junior Full Stack Developer with training in web layout and application development.

I have solid knowledge in Java, JavaScript and NoSQL databases (MongoDB), as well as experience in the use of frameworks such as React and React Native. My training is complemented by Agile methodologies and version control (Git), which allows me to work effectively in a team.

I am looking to join a dynamic environment where I can contribute my skills and continue to grow professionally.
